Course Overview

Artificial Intelligence (AI) is no longer only for technology departments. It is now a strategic tool for improving productivity, governance, service delivery, financial control, planning, reporting and decision-making across modern organizations.

This Magna Skills course is designed for professionals in government, business, NGOs, public sector institutions and development organizations who want to understand how AI can be practically applied in their daily work and institutional operations.

Participants will explore real-world AI applications, including Generative AI, automation, data analysis, digital service delivery, document drafting, reporting, risk management and organizational transformation. The programme is practical, non-technical and focused on helping leaders and professionals use AI responsibly to improve performance.

Course Outcomes

Course Outcomes

1. Understand key AI concepts and their practical application in business, government and public sector environments.
2. Apply AI tools to improve productivity, reporting, communication and decision-making.
3. Identify opportunities for AI adoption across departments, projects and organizational processes.
4. Promote responsible AI use by considering ethics, privacy, governance and institutional accountability.
5. Develop a practical AI adoption roadmap for organizational excellence and service improvement.

Course Outline / Curriculum
